10901 - Vaccinations against meningitis do not invalidate the fast

the question

Does a vaccination against meningitis invalidate the fast?.

Detailed answer

Praise be to Allah.

Vaccinations against meningitis do not invalidate the fast. There is nothing wrong with that, but if it is possible to give the injection at night, that is more on the safe side. And Allah is the Source of strength. May Allah send blessings and peace upon our Prophet Muhammad and upon his family and companions.
